

Task ID/Title: US-02.1 US-01.1

Purpose of AI Use: generate a visually relevant logo that matches the UI targets of the CarrerConnect site.

Chat Link or Prompt/Response:

<https://chatgpt.com/share/6ab94721-7b6c-83ea-af9b-13e2718affad>

AI-Suggested Content: created a final logo for the CareerConnect site when prompted to make changes that respect the UI targets.

Validation: Logo output is a simple UI design that is generated from scratch from the model, no risk of plagiarism as no external references are used.

Decision: Accepted, the logo without the background was disregarded the one with the white background, rather, was kept.

Reflection: AI effectively generated a brand logo that respect the constraints imposed unto its outputs.

Responsible Person: Arman Zakarian, 40343037

Task ID/Title: Generate 10 user stories.

Purpose of AI Use: Generating 10 user stories as per assignment requirements, in order to review and either approve or reject them.

Prompt :

Generate 10 user stories

Attached: [SOEN341_CareerConnect_Project_Sprint1. pdf]

Response:

Here are 10 AI-generated user stories for CareerConnect, based on your project specification. SOEN341_CareerConnect_Project_S...

AI-Generated User Stories

US-01 — Account Registration

As a job seeker, I want to create an account so that I can access personalized job-search features.

US-02 — User Login

As a registered user, I want to log in securely so that I can access my account and its information. Here are 10 AI-generated user stories for CareerConnect, based on your project specification.

US-03 — Profile Management

As a job seeker, I want to update my skills, education, and work experience so that recruiters can view my current qualifications.

US-04 — Resume Upload

As a job seeker, I want to upload my resume so that I can use it when applying for jobs.

US-05 — Job Posting Creation

As a recruiter, I want to publish a job posting with its title, description, requirements, and location so that I can attract suitable applicants.

US-06 — Job Search and Filtering

As a job seeker, I want to search for jobs by keyword and filter results by location and job type so that I can find relevant opportunities.

US-07 — Job Application Submission

As a job seeker, I want to apply for a posted job using my uploaded resume so that the recruiter can consider me for the position.

US-08 — Application Status Tracking

As a job seeker, I want to view whether each application is Applied, Interview, Offered, or Rejected so that I can track my progress.

US-09 — Saved Jobs

As a job seeker, I want to save interesting job postings so that I can easily return to them and apply later.

US-10 — Generative AI Resume Feedback

As a job seeker, I want to receive AI-generated feedback on my resume for a selected job posting so that I can improve how clearly it presents my relevant qualifications.

Your assignment requires at least 15 user stories in total. These 10 form the AI-generated portion; your team should brainstorm its own additions, place them under “Team-Generated User Stories and Features,” and record this interaction in the AI usage log

AI-Suggested Content: Suggested 10 user stories that will require review and approval

Validation: Team reviewed the 10 user stories on discord to assert whether or not they were for the final decision

Decision: Accepted

Reflection: AI helped generate general primary features in the form of convenient user stories that did not particularly require modifications, as they were evidently necessary. Additional user stories are evidently needed,for actual, advanced use cases.
